 - ✓ Commercial
 - ✓ Institutional
- SOLUTIONS

Save up to 65%
water and sewer costs!

We specialize in ultra-high efficiency plumbing fixtures that save water without compromising performance.

Services:

- Water Conservation Programs
Water Use Assessments, On Site Inspections, Design/build domestic water conservation retrofits, supply and installation of high efficiency equipment and maintenance solutions.
- Water Saving Kit Programs

Our goal is to help increase water efficiency in the residential and commercial sectors, by using the efficient technologies available and eliminating unnecessary leaks and water waste. We focus on cost efficient retrofits that maximize returns and results.

*Read what
our clients
are saying*

Popular Restaurant & Bar in Kingston

"The savings from my water bill paid for my investment after 5 months. Now, 4 ½ years later I have saved 8 times my investment, and my maintenance costs are significantly lowered."

High School with 3,000 student population in Kingston

"We engaged the company's services in August 2015 and have outfitted 90% of our restrooms in our high school with Instant Save's Restroom Solution. We not only saw a dramatic improvement on our savings as a result of Instant Save's Solution, but we also have less maintenance calls."

100 Bedroom Hotel in Negril

"Invested 2 million dollars with Instant-Save's Water Saving Solution, recovered my investment with 7 month of savings on my water bill. After 2 years the money saved is 4 million dollars, double my initial investment!"

Popular Fast Food Restaurant in Kingston

"Savings paid for investment in 5 months with further savings of \$1.4 Mil after 30 months"

Industrial Factory on Spanish Town Road

"Average restroom consumption decreased by 43% since installing Instant Save's Water Saving Solutions - This was a positive investment for us!"
- Plant Engineer

High School with 1,200 student population in St. Mary

"We used to buy two trucks of water per week, the week after we installed Instant Save's Fixtures, we only used one truck, and now after 2 years, we are still only buying one truck load of water per week."

Commercial Bank in May Pen

Instant-Save's Water Saving Faucets and Toilets were installed in staff male and female restrooms at the National Commercial Bank. Water consumption was recorded at an average of 142,000 litres in the period before the installation, and as a result of the water saving fixtures has been reduced to 107,000 litres in the period after the installation. This represents an overall 25% reduction on the water bill!
